

## **ELIF ENVIRONMENT, OCCUPATIONAL HEALTH AND SAFETY POLICY**

ELIF adopts and implements a management approach to protect the environment, prioritize occupational health and safety, guarantee compliance with the terms and requests of the customer, in addition to the privilege of technological and high-quality work.

With this purpose, in compliance with the laws, regulations, and by-laws as well as EU directives regarding environment and occupational safety, and customer requirements, it will develop worker health and occupational safety management systems compliant with ISO 14001 and OHSAS 18001 standards, and reinforce them through continuous improvements.

It will also make sub-contractors to observe the provisions, methods, and principles of laws and ISO 14001 and OHSAS 18001 standards, with the same discipline and attitude.

In this respect, ELIF;

- thinks of the environment in terms of the use of natural resources,
- closely monitors environment related publications,
- prevents and reduces waste, and carries out all activities required for recycling,
- ensures the selection of materials responsive to environment concerns, and suitable for occupational health and safety in terms of selection of equipment and vehicles,
- prevents waste in raw material use,
- achieves savings in power consumption, and reduces pollution,
- provides ergonomic and healthy work environments to minimize the risk of occupational accidents,
- offers trainings to improve environment and worker health - occupational safety awareness in employees.

It is ELIF's duty to inform all of its employees, visitors and suppliers about environment and occupational safety, to deliver safely the inheritance received to future generations.
